ABOUT THE SEMINAR

The Synthetic Yarn and Fiber Association is pleased to announce the 2009 Fall Seminar.

With the uncertainty of the economy, it is imperative to have direction for building for the future. Accordingly, the SYFA continues to have a focus on renewable topics as well as market trends and new products.

We will have speakers from the top of the synthetic fiber chain. BP will speak of the challenges in the supply chain. We will have the world's largest retailer, Wal-Mart who will speak on the changes within the retail market. DAK Americas and Shaw Industries have joined in Clear Path Recycling to establish the largest bottle recycling plant in North America, and they will have a progress report.

The automotive industry is vital to our future and CSM Worldwide will provide their forecasts. Other presentations will feature innovation in fibers, fabric design, customs enforcement, and global fiber and raw materials markets.

Join us October 8th at the Lowe's Motor Speedway for the 2009 SYFA Fall Seminar.
